GREEN PHARM COSMETIC is a modern cosmeceutical company of Ukraine. Our products represent a synergetic unity of healing forces of nature and the latest achievements of modern science and technology. This tandem proves highly productive and efficient, which is the main reason for the appeal of our products to the leading beauty experts and doctors.

In 2003, in Kharkov, Ukraine, the creator of special cosmeceutical complexes Natalia Nikolaevna Romanovskaya founded "HP-Cosmetics" company. Kharkov is the city associated with the emergence of Ukrainian pharmaceutical science in the areas of chemical synthesis of biologically active substances, as a result the company's “toolkit” collected unique recipes by the leading pharmacists and biochemists, as well as old recipes related to the ancient history of mankind.

Most our products are based on recipes that have been classified for a long time because they were developed for the military purposes to provide efficient medical aid to soldiers under extreme conditions. However, after the USSR collapse, all the developments remained unused.

In 2003, relying on their experience and advanced technologies the creators of unique products developed and released a few medical balms from the "SKIN RESCUE SERVICE" range produced on the basis of the scientific research in the field of corneotherapy and corneology. Due to their unique features the company products quickly gained popularity with the leading doctors and beauty experts in Russia and Ukraine.

«GREEN PHARM COSMETICS» company was founded in 2014 to manufacture the products that have already become popular as well as to develop and introduce promising innovative ones. That became the next stage of the "HP-Cosmetics" company development.

Our values:

We are a team of professionals working to satisfy the needs of our clients through development, introduction and production of innovative natural products granting beauty, health and positive emotions.

Our mission is as follows:

Taking the leading positions in the development, introduction and production of natural cosmetological and pharmaceutical products that are most efficient in helping people to be healthy and beautiful.

Our vision is:

Entering the top ten of Ukrainian producers and exporters of the cosmetological and pharmaceutical products of high quality.
Product information

The research of the mechanisms of the skin stratum corneum functioning, the skin cell biosystem and problems of the upper stratum pathology allowed us to create a unique product that contributes to cell regeneration and fast healing of wounds. The unparalleled quality of our product is that it restores the protective barrier function of the skin. Years of research have led to an important conclusion - the effect of any medication, applied to the skin surface, should be considered primarily in terms of its potential impact on the epidermal barrier. The novelty and uniqueness of our products is that they restore the skin barrier to the normal level, after the healthy skin can cope with emerging challenges. We don't add any hormones or chemical substances in our products. Only natural plant compounds in combination with high technology created on the basis of the latest achievements of the world scientific thought in areas such as dermatology, corneology, cosmetology, cytology, biochemistry and phytochemistry.

Today, our company manufactures its products using two brands: "SKIN RESCUE SERVICE" and «GREEN PHARM COSMETICS».

"SKIN RESCUE SERVICE" includes remedies that are designed to deal with skin diseases, as well as to contribute to the regeneration of the skin with various injuries as quickly as possible.

«GREEN PHARM COSMETICS» are cosmetic products intended for use by professional cosmetologists and for home care. Products by «GREEN PHARM COSMETIC» are based on plant extracts resulting in a mild effect on the epidermis and efficient elimination of the skin problems.

We cooperate with large pharmacy chains, beauty centers, doctors and dermatologists all over Ukraine. Our experts conduct field training seminars and workshops, participate in international beauty fairs. The material and technical base of the company (proper production) allows to carry out any task while our experience and long-term research give confidence in the effectiveness, uniqueness and irreplaceability of our products.
Why us?

• Our basic principle is the use of natural and safe ingredients.

• We use an extensive range of raw materials, grown only in eco-friendly areas, without pesticides, toxic fertilizers, that pass most careful tests in our laboratories.

• Our products do not contain any heavy metals, nitrates and genetically modified ingredients. Their effect is confirmed by certificates of quality and years of research.

• The range of our product effect is wide and versatile: from small problems in the form of acne, irritation and the first wrinkles to serious metabolic disorders as psoriasis or allergic diseases.

• We fight both for aesthetic health and for endogenous body health by safe and bioactive dietary supplements.

Green Pharm Cosmetic - Energy, youth, beauty and health for everyone..
Epitelisant is a regenerative therapeutic cream for damaged, sensitive skin. It is used for injuries associated with the hydro-lipid barrier damage, dermatological diseases involving violation of the epidermal barrier integrity. It is recommended for use during rehabilitation after chemical and laser peels, laser and photo epilation, dermabrasion as well as at the final stage of invasive procedures, such as contour correction, mesotherapy, biorevitalization, permanent makeup, mechanical and machine cleaning.

**Basic Properties:**
- High quality transdermal features (very easily and quickly absorbed);
- High quality natural moisturizing factor;
- Characterized by a pleasant herbal aroma (bouquet of sage, linden, Ginkgo biloba and Tamanu oil);
- Enriched with unsaturated fatty acids and tocopherols;
- Owing to the plant components acts as a powerful antioxidant;
- Restoring the hydrolipidic mantle of the skin and protects against dehydration;
- Improving the complexion and gives the skin a healthy glow;
- Smoothing wrinkles and softens the age lines;
- Non-comedogenic;
- Hypoallergenic;
- Protecting from external penetration of foreign substances and microorganisms;
- Restoring the epidermis;
- Accelerating healing and eliminating scars in case of skin damage;

**Application method:** the immediate application of the "Epitelisant" cream after the undergone procedures forms a thin protective layer on the skin, thus greatly reducing the possibility of infectious complications.

**The mechanism of action and active components:** antiedemic, anti-inflammatory, antiviral, antibacterial, antihematoma, antioxidant and moisturizing (yarrow, sage, St. John's wort, Tamanu oil). The cream strengthens and protects the vascular walls (chamomile, sage), reduces the capillary permeability and fragility (grape seeds), thereby decreasing the risk of bruising and swelling. Epitalisant also activates microcirculation in the skin and prevents the formation of stagnant erythema (chamomile, Tamanu oil). It lightens the skin (birch fiber), relieves pain, regulates the processes of epithelialization and repair (Tamanu oil, thistle oil) and stimulates metabolic processes, increases local immunity.

**Volume:** 150 ml
RESTORING FLUID

It is a cosmeceutical based on natural environmentally friendly plant oils and extracts. A high concentration of active substances, namely polyunsaturated fatty acids, flavonoids and vitamins A, E, K, allows to restore skin after any mechanical, chemical, photo-damage, and is also prescribed for home care after the procedure of permanent makeup and tattoo (has no effect on the pigmentation) as well as laser and photo epilation. Due to its light and airy structure, the fluid is quickly absorbed without leaving an oily sheen on the skin. It can be used under makeup as well.

Basic properties
• Helping the skin to restore the natural moisture balance;
• Contributing to the skin immunity;
• Protecting from free radicals;
• Preventing photo damage and aging;
• Evening out the complexion;
• Reversing inflammatory processes;
• Accelerating the skin healing after traumatic procedures;

Application method: in case of the profound skin damage the fluid must be applied 2-3 times a day or another period according to the cosmetologist prescription.

Recommendations for home care: suitable for all the types of skin. The fluid can be used as a night nourishing cream or a base for make up.
• The mechanism of action and active components: The harmonious combination of oils (Tamanu, thistle, black cumin) allows the skin to obtain the substances necessary for rapid regeneration. The synergy of plant extracts (wormwood, birch fiber, yarrow, grape seeds, chamomile, St. John's wort) relieves inflammation, itching, peeling and dryness of the skin, regardless of the cause.

Volume: 100 ml, 60 ml.
ACNE AND COMEDONES CONTROLLING PHYTOGEL

The phytogel structure includes active herbal ingredients reducing the coccal flora activation, having keratoplastic effect, as well as decreasing the sebaceous gland hypersecretion. It produces active impact on the areas affected by acne (papules, pustules, comedones, hyperkeratosis), but also has a positive effect on the skin with post-acne (congestion, atrophic and hypertrophic scars).

Basic Properties
Efficiently resolves the inflammatory elements;
Removing toxins;
Acting as a preventative measure;
Preventing the skin dehydration;
Restoring the natural acidic skin mantle;
Protecting from the sebaceous plug formation;
Resolving miliums (bunting) if used daily;

Application method: apply the gel to the cleansed face skin (under the film) for 10-15 minutes before the mechanical face cleaning. If used jointly with machine methods, it should be applied to the stated areas on the massaging lines. The gel is used with ultrasonic phonophoresis, ionophoresis, microcurrents for home care.

Recommendations for home care:
The gel should be applied twice a day to the cleansed skin. The treatment course amounts to two weeks or another period according to the cosmetologist prescription. As a preventative measure it is used once a day in the evening for 2-4 weeks or another term based on the cosmetologist’s recommendation.

Mechanism of action and active components: the remedy efficiently reduces the inflammation (allantoin, hop cones, wormwood, calendula), cleanses the skin (grape seeds) and has a pronounced anti-bactericidal effect (hop cones, calendula, yarrow, horse chestnut).

Volume: 150 ml.
BIOPROTECTOR SERUM
FOR EYE CONTOUR AREA

It is a hypoallergenic soft moisturizer without any coloring agents or perfume additives designed specifically for delicate and sensitive skin around the eyes. It facilitates the skin relief evening, relieves swelling. The serum stimulates the regeneration of tissues, the skin is refreshed, it becomes more elastic due to the active synthesis of hyaluronic acid with fibroblasts. If used regularly the serum reduces swelling and circles around the eyes, it gently lightens the skin, smoothens and restores its youthful appearance.

Basic Properties
• the skin becomes smoother and more elastic;
• gentle elimination of the small wrinkles network, reduction of the expression wrinkles depth
• Prevention of premature and photo aging of the skin;
• Strengthening the cell matrix;

Application method: Apply the serum once or twice a day to the skin around the eyes.

Mechanism of action and active components: due to the ingredients of the natural plant components contributing to the regular exfoliation of the top keratin layer, the skin is becoming smooth (white peas protein). The herbal antioxidants the serum contains (sage, chamomile, succession, coffee, St. John’s wort) provide a powerful protection for the skin. Moisturizing and strengthening the skin matrix (hyaluronic acid) helps to return a healthy appearance to the skin.

Volume: 60 ml
The serum contains hyaluronic acid and tri-peptide viper venom (SYN-AKE). It is a botulin-like remedy that influences the nerve endings and prevents the restoration of facial hyperactivity. It slows down the conductibility of nerve impulses and thereby gently relaxes the muscles. It can be combined with injections of hyaluronic acid (for a more pronounced effect).

**Basic Properties**
- perfect skin smoothing and wrinkle reducing;
- efficient as an alternative to botox;
- ensuring extra lifting, nourishing, elasticity and profound moisturizing of the skin;

**Application method:** Apply it on the cleansed skin, in the area of "crow's feet" at the outer corner of the eye. Due to the cumulative effect of the serum the recommended term of application is quite individual. The course duration is prescribed by the cosmetologist. The intensity of the course depends on the wrinkles severity:

For strongly pronounced wrinkles the recommended course amounts to 3 weeks of application once per day with light tapping motions in small amounts on the area of the "crow's feet". After this take a break in using the serum for two weeks.

For weakly pronounced wrinkles the recommended term of use is 2 weeks of application once a day. Then make a week break.

It is not recommended to use the serum during pregnancy or lactation, the term of application should not be prolonged for more than 40 days!

**Mechanism of action and active components:** excellent smoothing effect (hyaluronic acid, SYN-AKE) without disturbing the natural facial expression. Due to the supporting plant complexes (beggars-ticks, chamomile, grape seed, calendula, willow, sage) the skin regains its healthy look.

**Volume:** 15 ml
Our gel is a modern and safe remedy of a new generation for lightening the pigmentation, regardless of its depth and causes. Through active herbal ingredients the synthesis of melanin in the skin is slowing down significantly. It also accelerates the epidermis cell renewal, thereby removing the excessive melanin from the skin, it becomes smooth, elastic and radiant. The phytogel structure further includes active moisturizing, softening and protective components. It is effective against pigmentation spots not only on the face but also on the whole body. The gel can be used with ultrasonic phonophoresis.

**Basic properties**
- Lightening spots (pigmentation or post-acne spots);
- Evening out the complexion;
- Stimulating the cell regeneration;
- Providing moisturizing, softening and protective effect;
- Restoring the skin relief;
- Preventing the formation of new pigmentation spots;
- Protecting from photo aging;
- Non-comedogenic;

**Application method:** When undergoing the ultrasonic phonophoresis the gel must be applied to the pigmentation area.

**Recommendations for home care:** Apply the phytogel to the cleansed pigmentation areas in a thin layer in the morning and evening. It can be used under make-up. There are no seasonal use restrictions. The minimum application course is 4 weeks.

**Mechanism of action and active components:** The phytogel has pronounced depigmentation properties due to the natural plant extracts (birch fiber, bearberry, wormseed, licorice extract). The remedy ensures the complex skin regeneration (allantoin, hop cones), enhances its immunity (rosehip, chamomile), moisturizing (hyaluronic acid), and gives it a healthy look. In addition, in case of long-term use the skin relief (papain) is restored.

**Volume:** 150 ml
ANTI-COUPEROSE
PHYTOGEL

It is a modern vasoprotective remedy of plant origin for all the types of skin affected by couperose. It strengthens the walls of vessels, reduces the angiaasthenia, increases the vascular tone and protects against harmful effects of the environment. The gel produces softening and moisturizing effects. If used regularly it restores the blood microcirculation, efficiently influences the blood vessels, removes redness of the skin and vascular spiders. The active complex of the phytogel contains the K vitamin strengthening the surface capillaries. The gel is intended for the skin prone to redness due to adverse weather conditions and sharp temperature changes. It is used with the ultrasonic phonoressis for home care.

Basic Properties
• strengthening the capillary walls;
• improving the blood microcirculation;
• removing the visual indications of the vascular network;
• preventing couperose and rosacea;
• non-comedogenic;

Application method: apply the gel to the areas affected by couperose with the machine methods usage. During the machine-free usage it should be applied to the cleansed skin areas to be absorbed. To enhance its effect, the gel must be used under a film.

Recommendations for home care: apply the gel once a day to the cleansed skin affected by couperose. It can be used under make-up. The minimum treatment course amounts to 1 month or another period according to the cosmetologist prescription.

The mechanism of action and active components: The phytogel composition includes natural plant extracts with a high content of vitamin K (rosehips, nettle, blind weed, eleuterococcus), without it no synthesis of proteins responsible for coagulation is possible. The phytogel strengthens the walls of blood vessels, compresses the skin matrix. The remedy effectively relieves inflammation (allantoin), moisturizes the skin (hyaluronic acid), and returns its healthy youthful appearance.

Volume: 150 ml.
ANTICELLULITE PHYTOGEL

Active ingredients of the phytogel ensure a high efficiency during the cellulite treatment and prevention. The herbal complex overcomes the skin barrier, promotes the process of splitting the refractory fat, improves blood microcirculation (positive effect on the lymph, causing it to move faster without stagnating anywhere), so that the toxins and free radicals are removed from the skin cells, the treated areas of skin are subject to cleansing and detoxication, the gel also improves the skin appearance. As a preventive measure, the gel protects from lipogenesis. It is used with ultrasound phonophoresis, iontophoresis, microcurrents, after the massage as the final stage, as well as for home care.

Basic Properties
• reducing the local fat deposits;
• improving the blood microcirculation in vessels and capillaries;
• removing toxins;
• ensuring the skin elasticity and smoothness;

Application method: apply the phytogel with massaging movements to the affected areas of the cleansed skin. Rub it in for 5-10 minutes. The procedure can be finished with a compress by covering the remains of the gel with the polyethylene film.

Recommendations for home care: Apply the gel to the problematic areas with massaging movements for 5 minutes after the shower in the evening.

Mechanism of action and active components: The plant extracts, the phytogel contains, have a complex effect – they cool (peppermint) and heat (red pepper) the skin. Therefore the subcutaneous vessels constrict and dilate. This prevents them from stagnation, restores their tone (nutmeg) and accelerates the blood circulation. Waste products and toxins are removed from the cells (grape seeds) in all the skin layers. The phytogel moisturizes and exfoliates the dead skin cells, refreshes the skin and makes it elastic and velvety (grape seeds, calendula, sage, cloves, hyaluronic acid). The metabolic processes in the tissues and the decomposition of body fat are accelerated (coffee).

Volume: 150 ml
BIOPROTECTOR CREAM

The cream provides full protection of the skin from free radicals and adverse weather conditions. The product reduces the skin sensitivity to harmful external and internal factors, improves the regeneration process, has anti-inflammatory and UV protective properties. The cream creates a powerful defense for the skin against moisture loss, thus contributing to the proliferation of fibroblasts (cells of youth) and protection against collagen-elastin fibers damage. It helps the skin to preserve elasticity and youthfulness and acts as a preventative measure against photoaging. The cream forms a thin protective film on the surface of the skin. It can be used as a day care for oily skin, applied all over the face, including the eye contour area and neck.

Basic Properties

• protecting the skin from UV radiation and extreme weather conditions in any season;
• preventing the skin tightening and dehydration;
• protecting from the moisture loss;
• non-comedogenic;
• used in winter for lips protection against crusting or freezing injuries;

Application method: apply the cream to the cleansed face skin in a thin layer before going out. It can be used under make-up and as a protective hand cream or lip balm.

Mechanism of action and active components: Due to the natural plant sunscreen (chamomile, sage) and mechanical filters (zinc oxide, titanium oxide) protecting from photo-aging and damage, the dry and sensitive skin obtains a reliable protection from UV radiation. Thereby the film formed on the skin retains moisture and protects against sharp temperature changes, at any time of the year (yarrow, sage, chamomile, St. John's wort).

Volume: 150 ml
Balm 911
FOR DAMAGED SKIN

It contributes to the restoration of the skin upper layer and ensures further care for it. The balm is efficient against dehydration, irritation, fissures, burns, insect bites, scratches, cuts, allergic rashes and increases the overall immunity of the skin.

Basic Properties:
• restoring the skin in case of any damage, bruises, abrasions;
• soothing the skin irritated with allergy, irritation, dermatitis;
• applied in radiology to protect skin before undergoing radiation;
• removing scars (minimum 25%), keloids;

Application method: apply the balm twice a day or as necessary.

Active components: CO2 extracts of chamomile, yarrow, St. John's wort, thistle oil, Tamanu oil, black cumin oil.

Volume: 100 ml.
Balm 911 EXTREME

The balm 911 is a fast-acting anti-inflammatory and protective agent. It has the effect of "wet bandaging", under a layer of balm the damaged skin is restored without any scars. The balm is efficient for burns, fissures, deep cuts and scratches.

Basic Properties:
• efficient against eczema;
• healing of long-term wounds, ulcers;
• “wet bandage” effect – anti-bacterial and protective action for injuries;

Application method: apply the balm twice a day or as necessary.

Active components: castor oil, CO2 extracts of yarrow, hop cones, chamomile, calendula.

Volume: 100 ml
Balm 911
FOR CHILDREN

The balm provides gentle care for the baby skin from the first days of his life. It protects the baby's skin from infections, allergies, inflammation and irritation, softens and helps to shape the upper corneum stratum. The balm has hypoallergenic and antiseptic properties.

**Basic Properties**
- forming the skin immunity of the baby;
- used instead of powdering under the diaper without dehydrating the skin;
- efficient against heat rash, baby's dermatitis;

**Application method:** use the balm to the cleansed skin of the baby before changing the diaper. It should be applied to the damaged skin twice a day.

**Active components:** CO2 extracts of chamomile, beggars-ticks, yarrow, French willow, black cumin oil, thistle oil, Tamanu oil.

**Volume:** 100 ml
Balm 911 Phytopsor

The balm is a regenerative, restorative, anti-inflammatory, immune stimulating, preventive and protective agent based on polyphenols, grape and herbal extracts. It is efficient for significant skin lesions, psoriasis, all types of skin ulcers, manifestations of allergic reactions. It relieves the symptoms and restores the skin's immunity, improves the quality of life of the patient. It is not a medicinal product.

**Basic Properties:**
- relieving the psoriasis symptoms;
- efficient against eczema;

**Application method:** the application amount is not strictly defined. The balm can be used for the whole day with or without a bandage.

**Active components:** phenocor (grape polyphenols), salicylic acid, CO2 extracts of carrot seed, pine, French willow, calendula, birch fiber, amaranth oil, sea buckthorn oil, zinc oxide.

**Volume:** 100 ml.
Balm 911
LARKSPUR

It is recommended as an adjunct remedy for the treatment of joint diseases: osteochondrosis, radiculitis, arthrosis, arthritis, uratic arthritis. The Larkspur stimulates the regeneration of damaged tissues, relieves swelling and muscle spasm, accelerates recovery from fractures, sprains and bruises. It reduces degenerative changes in the joints, improves mobility, stimulates the regeneration of cartilage tissue, and increases the body’s ability to produce collagen and proteoglycan necessary to restore the joints. The balm gently stimulates nerve endings, improves the blood circulation.

**Basic Properties:**
- restoring the cartilage surface of joints, improves their mobility;
- anti-inflammatory effect
- efficient against neuralgia;

**Application method:** apply the balm to the damaged area of the skin several times a day with light massaging movements.

**Active components:** castor oil, allantoin, CO2 extracts of ginger, hop cones, French willow, nettle, horse chestnut.

**Volume:** 100 ml.
HORSE CHESTNUT
Venogel 911

It is intended for daily care of the feet, prone to manifestations of the varicose disease symptoms. Owing to a special formula, the active components of the gel deeply penetrate into the skin, protect the cells of the venous wall from the damaging effect of free radicals.

Basic Properties:
• strengthening the vascular wall;
• improving the venous valves functioning;
• reducing the blood clot formation;
• removing the soft tissue swelling
• curing the ischemic ulcers;

Application method: apply the gel to the cleansed skin of the feet with massaging movements until completely absorbed.

Active components: CO2 extract of horse chestnuts, rose hips, bay leaf, dock, calendula, thistle oil, allantoin.

Volume: 100 ml
RELAXGEL 911 FOR FEET

It is a natural and safe remedy made of natural plant components, quickly eliminates swelling, relieves the feet fatigue and heaviness. The gel mitigates fatigue immediately after application. It has a reinforced phleboprotective effect: the gel strengthens the walls of blood vessels reducing their permeability and improving the blood microcirculation. It gives the skin a pleasant fresh scent.

Basic Properties:
• preventing the foot swelling;
• reducing the fatigue and heaviness of the feet;
• cooling effect;

Application method: apply the gel to the cleansed feet skin till fully absorbed.

Active components: CO2 extracts of periwinkle, mint, chamomile, pine, essential oil of eucalyptus.

Volume: 100 ml.
Phytocream 911
FOR FEET

This remedy softens and gently exfoliates the rough skin of the feet, heals fissures and reduces their depth. The cream moisturizes the feet skin. It is designed for daily skin care.

Basic Properties:
• moisturizing the foot skin;
• reducing sweating;
• eliminating the unpleasant odor;
• antifungal effect;

Application method: carefully apply the cream to the cleansed foot skin. Special attention should be paid to the heels and to the skin between the toes.

Active components: CO2 extracts of carrot seed, lavender, St. John’s wort, nutmeg, urea.

Volume: 100 ml
WARMING PHYTOCREAM
911
FOR MUSCLES AND JOINTS

Due to its unique combination of bioactive components of plants the Phytocreme produces a profound long-term warming and invigorating effect on the skin and underlying tissues. It is recommended as an adjunct remedy in the treatment of bone and joint diseases, has anti-inflammatory, antibacterial and antirheumatic effect and improves microcirculation. The cream improves the metabolic processes in the joints, enhances the tissue nutrition, restores the joints mobility, accelerates regeneration of ligaments.

Basic Properties:
• relieving swelling and muscle spasm;
• ensuring the nutritious support for the musculoskeletal system;
• accelerating the regeneration processes after fractures, bruises, ligament tension and strains;

Application method: apply the cream with moderate movements by intensive rubbing in the cleansed skin of the damaged area.

Active components: CO2 extracts of cloves, nutmeg, chamomile, rosemary, juniper.

Volume: 100 ml
